Antitrust Policy

All project meetings are subject to the Linux Foundation Antitrust Policy.
The following topics must not be discussed:

- Price-sensitive information

- Actual or projected changes in production, output, capacity or inventories

- Matters relating to bids, prospective bids, or bid policies

- Matters relating to actual or potential individual suppliers that might influence the business conduct of firms toward such suppliers

- Matters relating to actual or potential customers that might have the effect of influencing the business conduct of firms toward such customers

- Current or projected costs of procurement, development or manufacture of any product

- Market shares for any product or for all products

- Confidential or otherwise sensitive business plans or strategy

If you have questions, please contact legal@finos.org

Meeting Notice

- FINOS Project leads are responsible for observing the FINOS guidelines for running project meetings. Project maintainers can find additional resources in the FINOS Maintainers Cheatsheet.

- All participants in FINOS project meetings are subject to the LF Antitrust Policy, the FINOS Community Code of Conduct and all other FINOS policies.

- FINOS meetings involve participation by industry competitors, and it is the intention of FINOS and the Linux Foundation to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of, and not participate in, any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws. Please contact legal@finos.org with any questions.

- FINOS project meetings may be recorded for use solely by the FINOS team for administration purposes. In very limited instances, and with explicit approval, recordings may be made more widely available.

FINOS
Project Sandbox

Fintech Open Source Foundation

The FINOS Project Sandbox allows **FINOS open source projects** to host a public runtime environment to serve different purposes, like enabling easy evaluation, public collaboration or delivering real life demo environments.

The FINOS technology team provides infrastructure and operational support to project maintainers, enabling them to focus on development rather than operations.

OSFF London

June 26

London

The only conference dedicated to driving collaboration and innovation in financial services through open source software and standards.

We bring together experts across financial services, technology, and open source to engage our community in stimulating and thought-provoking conversations about how to best (and safely) leverage open source software to solve industry challenges.

OSFF New York

Sept 30 & Oct 1

New York Marriott Marquis,
New York City

The only conference dedicated to driving collaboration and innovation in financial services through open source software and standards.

We bring together experts across financial services, technology, and open source to engage our community in stimulating and thought-provoking conversations about how to best (and safely) leverage open source software to solve industry challenges.

FSI Hackathon for Autism

Lets bring FSI developers together to demonstrate how innovative Microsoft technologies can transform autism services for profound autism by tackling real world use cases provided by families and creating lasting open-source projects for the community.

FSI HACKATHON FOR AUTISM

3-4 April 2024
Hybrid/NYC
